GDDL: Gana Digital Driver License

A Secure, Digital-First Implementation of the Vienna Convention (1968)

In accordance with Article 41 of the Vienna Convention on Road Traffic, the Republic of Gana introduces the GDDL, a fully digital driver license with built-in legal compliance, biometric security, and instant verifiability.

Key Features:

- Issued only after validated theoretical and practical examination.
- Biometric-bound digital identity.
- QR-based validation available 24/7 at: <https://ministry-gana.online/verify.php>
- Cryptographically signed and timestamped issuance.
- Real-time revocation, renewal, and audit capability.

International Validity:

The GDDL is legally valid for international recognition under the Vienna Convention, as it satisfies all core requirements of Article 41:

- Issuance by competent authority
- Identity verification
- Medical and age compliance
- Verifiable authenticity through public infrastructure

Foreign inspection authorities are invited to:

1. Scan the QR on-screen or from a printed GDDL document.
2. Confirm authenticity via secure government server: <https://ministry-gana.online/verify.php>
Official verification: <https://ministry-gana.online/verify>
